

incubator

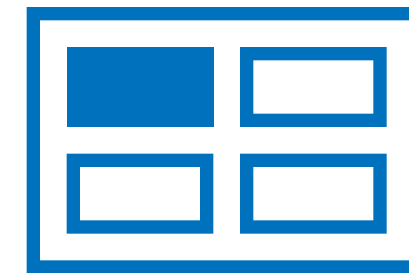

**There is growing demand from developers to  
publish patterns, blogs, how tos, tech talks  
on IBM Code**

**The process is not scaling ...**

- 1] hard for all teams to access Wrike**
- 2] tricky to communicate progress**
- 3] increasing need for self service**
- 4] advocacy devs want to create too**

**Lets think about a more open system  
to build a culture of consistent,  
transparent,  
self managed, incubated content**

# Agile board on GitHub

## Proposed

### Pattern

## **Benefits of switching to GitHub:**

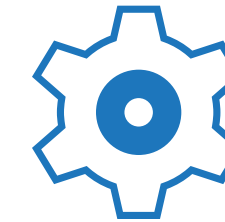

- 1] all internal teams can access**
- 2] ideas and progress are transparent**
- 3] can integrate with Slack**
- 4] developers can help each other**
- 5] more autonomy, but still approval and consistency**

# What do you want to publish?

Blog Post

Pattern

Tech Talk

How To

## Patterns

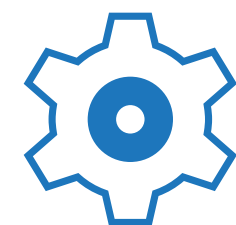

**Patterns are self contained examples that provide a great solution to a commonly occurring cloud or NLP problem**

**Browse examples**

Clicking here will take you to the patterns catalogue

**Start a new pattern**

Clicking here will create a github issue on the incubator board and guide you through the pattern process

## Patterns
